

Selim Yagci

M.Sc. Informatics | AI/ML Engineer | Software Developer

Munich, Germany | (+49)15255791052, (+90)5465784978 | [linkedin.com/in/hasanselimyagci](https://www.linkedin.com/in/hasanselimyagci) | github.com/hasanselimyagci | hasanselimyagci@gmail.com

MSc Informatics graduate with a strong interest in machine learning, natural language processing, and generative AI. Proficient in Python, with diverse software development experience spanning various domains. Driven to contribute to cutting-edge projects in AI and software engineering.

EDUCATION

Technical University of Munich, Munich, Germany 05/2021 – 11/2024

- Master of Science – Informatics
- Focus: Machine Learning, Natural Language Processing, Deep Generative Models, Applied AI, Visual Data Analytics
 - Thesis: **Adapter-based Multi-domain Adaptation and Evaluating Factuality in Language Models** (PEFT, Knowledge Enhancement, MoE, RAG, Evaluation Metrics)
 - Projects: **Explainable Classification and Transformation of Abusive Text** (Ethics of AI, LLMs, Explainability Methods, Instruction Fine Tuning, In-Context Learning, CoT-Prompting), **Self-Supervised Learning and Graph Neural Networks** (Conducting a comprehensive literature review, Contrastive Learning, Graph Augmentations, Domain Generalization), **Multilingual Misogyny Detection for Social Media Platforms** (Multiclass Text Classification, Bias Mitigation, Inference Optimization, Language Adapters), **Generative AI in Memory Politics** (Assessing capabilities of AI models creating distorted images of reality, Stable Diffusion, Image-to-image, Deep RL)
 - GPA: 2.2 / 1.0

Bilkent University, Ankara, Turkey 09/2015 – 01/2020

- Bachelor of Science – Computer Engineering (Awarded with Full Scholarship)
- Focus: Software Engineering, Mathematics, OOP, Database Systems, Automata Theory, Algorithms, Machine Learning
 - Internships: Software Development, Java, REST API, Web, HTML/CSS, Java, Android, CI/CD, Git
 - Projects: Recommender Systems and Human-Centered Software Design
 - GPA: 3.1 / 4.0

WORK EXPERIENCE

Incuda GmbH, Munich, Germany 06/2021 – 11/2021

- Data Engineer
- Developed and maintained ETL pipeline practicing data orchestration, transformation, integration (SQL, Pentaho, Apache)
 - Implemented data science models for order cancellation forecasting and customer segmentation (Python, Jupyter, ML)
 - Collaborated with an international team to meet the requirements from various clients and diverse business needs

Commencis, Istanbul, Turkey 06/2020 – 11/2020

- Software Developer
- Developed native mobile app for bank customers focusing on code optimization, latest practices, low latency, accessibility and security (Kotlin, Java, Android SDK)
 - Managed multiple parts of SDLC by implementing automated tests, monitoring results, versioning and deployment
 - Researched and designed solutions for user behaviour analytics and anomaly detection (Python, PyTorch)

Beytepe Bilisim, Ankara, Turkey 06/2019 – 11/2019

- Intern Software Developer
- Research and development of projects for TV provider clients, applying Human-centered Software Design and CI/CD practices

SKILLS

- Python, Java, SQL, C/C++, Kotlin • PyTorch, Tensorflow, Pandas, Numpy, scikit-learn, Transformers, LangChain, OpenAI, LlamaIndex, HuggingFace • Linux, Docker, FastAPI, Jupyter, Colab, Git, Kubernetes, AWS, Streamlit
- LLMs, Generative AI, RAG, Training and Inference, Model Deployment, Containerization, Model Compression
- Individual Researcher, Self-organization, Fast learner, Creative Problem Solving, Critical thinking, Communication
- English (C1), German (B1), Turkish (Native)
