

Selim Yagci

M.Sc. Informatics | AI/ML Engineer | Software Developer

Munich, Germany | (+49)15255791052, (+90)5465784978 | [linkedin.com/in/hasanselimyagci](https://www.linkedin.com/in/hasanselimyagci) | github.com/hasanselimyagci | hasanselimyagci@gmail.com

MSc Informatics graduate with a strong interest in machine learning, natural language processing, and generative AI. Proficient in Python, with diverse software development experience spanning various domains. Driven to contribute to cutting-edge projects in AI and software engineering.

EXPERIENCE

- Master Thesis (TUM)

May 2024 – Nov 2024

 - Worked on my Master Thesis Project, focusing on Adapter-based Multi-domain Adaptation and Evaluating Factuality in Language Models using various techniques, such as PEFT, Knowledge Enhancement, Mixture-of-Experts, and RAG.
- Interdisciplinary Project (TUM)

Sep 2023 – March 2024

 - Collaborated with experts in Computational Social Science to develop a misogyny detection tool for social media platforms.
- Data Engineer **Incuda GmbH, Munich, Germany**

June 2021 – Dec 2021

 - Developed and maintained ETL pipeline practicing data orchestration, transformation, integration (SQL, Pentaho, Apache).
 - Implemented data science models for order cancellation forecasting and customer segmentation (Python, Jupyter, ML).
 - Collaborated with an international team to meet the requirements from various clients and diverse business needs.
- Software Developer **Commencis, Istanbul, Turkey**

June 2020 – April 2021

 - Developed native mobile app for bank customers focusing on code optimization, latest practices, low latency, accessibility and security (Kotlin, Java, Android SDK).
 - Managed multiple parts of SDLC by implementing automated tests, monitoring results, versioning and deployment.
 - Researched and designed solutions for user behaviour analytics and anomaly detection (Python, PyTorch).
- Software Developer (Intern) **Beytepe Bilisim, Ankara, Turkey**

Nov 2019 – May 2020

 - Research and development of projects for TV provider clients, applying Human-centered Software Design and CI/CD practices

EDUCATION

- Technical University of Munich, Munich, Germany**

May 2021 – Nov 2024

Master of Science – Informatics

- Focus: Machine Learning, Natural Language Processing, Deep Generative Models, Applied AI, Visual Data Analytics
 - Projects: Explainable Classification and Transformation of Abusive Text (Ethics of AI, LLMs, Explainability Methods, Instruction Fine Tuning, In-Context Learning, CoT-Prompting), Self-Supervised Learning and Graph Neural Networks (Contrastive Learning, Graph Augmentations, Domain Generalization), Generative AI in Memory Politics (RAG, Stable Diffusion, Deep RL)
 - Grade: 2.2 / 1.0
- Bilkent University, Ankara, Turkey**

Sep 2015 – Jan 2020

Bachelor of Science – Computer Engineering (Awarded with Full Scholarship)

- Focus: Software Engineering, OOP, Database Systems, Automata Theory, Algorithms, Machine Learning, Statistics
 - Project: Recommender Systems and Human-Centered Software Design
 - Grade: 3.1 / 4.0

SKILLS

- Python, Java, SQL, C/C++, Kotlin
- PyTorch, Tensorflow, Pandas, Numpy, scikit-learn, Transformers, LangChain, OpenAI, LlamaIndex, HuggingFace
- Linux, Docker, FastAPI, Jupyter, Colab, Git, Kubernetes, AWS, Streamlit
- LLMs, Generative AI, RAG, Training and Inference, Model Deployment, Containerization, Model Compression
- Individual Researcher, Self-organization, Fast learner, Creative Problem Solving, Critical thinking, Communication
- English (C1), German (B1), Turkish (Native)
