

Selim Yagci

M.Sc. Informatics | AI/ML Engineer | Software Developer

Ankara, Turkey | (+90)15255791052, (+90)5465784978 | [linkedin.com/in/hasanselimyagci](https://www.linkedin.com/in/hasanselimyagci) | github.com/hasanselimyagci | hasanselimyagci@gmail.com

MSc Informatics graduate with a strong interest in machine learning, natural language processing, and generative AI. Proficient in Python, with diverse software development experience spanning various domains. Driven to contribute to cutting-edge projects in AI and software engineering.

EXPERIENCE

Master Thesis Project (TUM) 04/2024 – 11/2024

- Worked on my Master Thesis Project, focusing on Adapter-based Multi-domain Adaptation and Evaluating Factuality in Language Models using various techniques, such as PEFT, Knowledge Enhancement, Mixture-of-Experts, and RAG

Interdisciplinary Project (TUM) 09/2023 – 03/2024

- Collaborated with experts in Computational Social Science to develop a misogyny detection tool as browser extension

AI/ML Engineer (Freelance) 06/2022 – 08/2023

- Developed a legal inquiry chatbot for a law office using a RAG pipeline, retrieving knowledge from legal documents.
- Designed an AI pipeline for a pet supply store, leveraging image classification and text generation.

Data Engineer Incuda GmbH, Munich, Germany 06/2021 – 12/2021

- Developed and maintained ETL pipeline practicing data orchestration, transformation, integration (SQL, Pentaho DI)
- Implemented data science models for order cancellation forecasting and customer segmentation (Python, Jupyter)
- Collaborated with an international team to meet the requirements from various clients and diverse business needs

Software Developer Commencis, Istanbul, Turkey 06/2020 – 02/2021

- Developed mobile apps focusing on code optimization, low latency, accessibility and security
- Managed multiple parts of SDLC by implementing automated tests, monitoring results, versioning and deployment
- Researched and designed solutions for user behaviour analytics and anomaly detection (Python, PyTorch)

Software Developer (Intern) Beytepe Bilisim, Ankara, Turkey 11/2019 – 05/2020

- R&D of projects for TV provider clients, applying Software Design principles and CI/CD practices

EDUCATION

Technical University of Munich Munich, Germany 05/2021 – 11/2024

Master of Science – Informatics

- Focused on ML, Advanced NLP, Deep Generative Models, Applied AI and Visual Data Analytics
- Done several projects including: Explainable Classification and Transformation of Abusive Text (using BERT, OpenAI API, and LIME), Self-Supervised Learning and Graph Neural Networks (investigating domain generalization on graph data), Generative AI in Memory Politics (building a RAG and Stable Diffusion pipeline and investigating Deep RL techniques)
- Grade: 2.9 / 4.0

Bilkent University Ankara, Turkey 09/2015 – 01/2020

Bachelor of Science – Computer Engineering (Awarded with Full Scholarship)

- Focused on Software Engineering, OOP, Database Systems, Automata Theory, Algorithms, ML, Statistics
- Implemented an android app focusing on Recommender Systems and Human-Centered Software Design concepts
- Grade: 3.1 / 4.0

SKILLS

- Python, Java, SQL, C/C++, Kotlin
- PyTorch, Tensorflow, Pandas, Numpy, scikit-learn, Transformers, LangChain, OpenAI, LlamaIndex, HuggingFace
- Linux, Docker, FastAPI, Jupyter, Colab, Git, Kubernetes, AWS, Streamlit
- LLMs, Generative AI, RAG, Training and Inference, Model Deployment, Containerization, Model Compression
- Individual Researcher, Self-organization, Fast learner, Creative Problem Solving, Critical thinking, Communication
- English (C1), German (B1), Turkish (Native)
